INTERNATIONAL JOURNAL OF ADVANCES IN MEDICAL BIOTECHNOLOGY

Dear colleague

We would like to invite you to submit scientific articles for the next issue of the International Journal of Advances in Medical Biotechnology (IJAMB).

FOCUS and SCOPE

The International Journal of Advances in Medical Biotechnology is an interdisciplinary journal publishing research within the field of Medical Sciences and Biotechnology, and correlated applications. It publishes technical and scientific papers on fundamental aspects and technologies in such areas as biopolymers, biomaterials, medical chemistry, drug delivery, health, nanotechnology, pharmaceuticals, metals in medicine, tissue engineering and regenerative medicine.

Topics of interest to the journal:

- Regenerative Medicine
- Biomembranes and Biopolimers
- Slow delivery systems of drugs
- Medical devices
- Organic and inorganic medical chemistry
- 3D structuresGrowth factors
- Tissue Engineering
